Backup and Restore Wireless Network Profiles using Direct Clone

APPLIES TO

Point Mobile devices with Android 5.0.2 or above

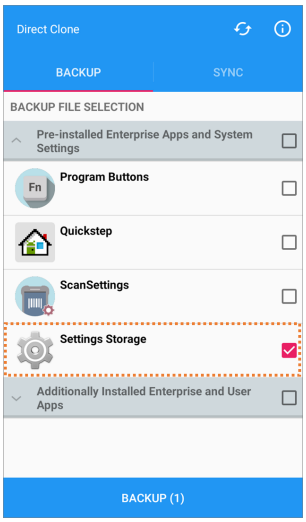
Read Direct Clone Guide First

Read Direct Clone guide first for better understanding.

What to Backup?

(This section describes what to backup in the Step 2 of Master Device side in the Direct Clone guide.)

In the master device that will be the standard, select **Settings Storage** to backup the wireless network profiles (Wi-Fi, Mobile network, ethernet, etc.) from the **BACKUP** tab of the Direct Clone.



Backup coverage depends on model and SKU. For detail information, please contact Point Mobile.

How to Restore?

- From the master device, select the backup file and tap **Direct Clone** icon

in the **SYNC** tab.
- From the client devices, tap **START DIRECT CLONE SERVICE** to get the backup file and restore using it.

Refer to the **Direct Clone** for more detailed steps.
