Get RFID Tag Data to PC (Preview)

Basically, the Point Mobile RFID readers can be connected with Point Mobile Android devices only.

But sometimes you need to get the RFID tag data read by RFID reader to your PC.

This article introduces the ways to get data to PC. Read this and improve your productivity!

APPLIES TO

Point Mobile RFID readers

Ways to Get Data to PC

The following ways are available.

- Saving data as CSV file via RFIDControl
- Receiving data as keyboard events using a Remote desktop app

1. Saving data as CSV file via RFIDControl

RFIDControl app provides the feature of saving the data as CSV file when using RFID Demo app.

The CSV file will be saved in the host device's storage, and you can copy that to your PC.

Read Save RFID Tag Data as CSV file via RFID Control for the detail.

2. Receiving Data as keyboard event using a Remote desktop app

If you use a remote desktop app, you can get the tag data as soon as the tag is read by the RFID reader, using keyboard event wedge.
