# Point Mobile Flutter & React Native & Xamarin SDK (Preview)

## Flutter & React Native & Xamarin

Flutter, React Native, and Xamarin are mobile cross-platform framework which is top interest for mobile app development.

The growth of cross-platform frameworks is because the effort to support two leading mobile platforms, iOS and Android, with a single code base.

It can reduce the hard work of managing two codes for each platform.

|  | Flutter | React Native | Xamarin |
|---|---|---|---|
| Corportate Backing | Google | Meta (Facebook) | Microsoft |
| Language | Dart | Javascript | C# |
| Since | 2018 | 2015 | 2011 |
| Documentation | Go | Go | Go |

There is no exception in developing the scanner application for Point Mobile devices. The customers requests the new framework for multi-platform.

To meet the customers' needs, **Point Mobile supports the flutter and React Native samples for the barcode scanner.** (Point Mobile Xamarin SDK supports more components such as Keypad.)
