RFID Development - RFID Sample

Point Mobile provides RFID sample app to help you develop an RFID app for Point Mobile RFID readers more easily.
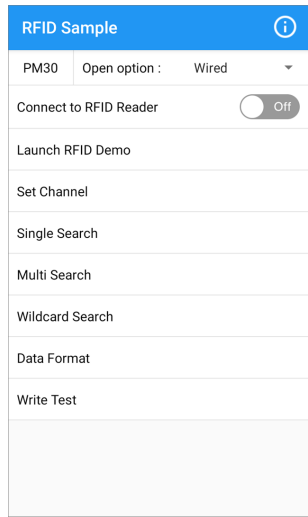

Download the sample with the below link.

Download

You can see the sample code and APK file in the sample file.

- APK file location: app > release
- **API descriptions** *(Login required)*

The sample app provides the following menus. You can refer to each menu to develop the feature.

- Connect RFID reader (Wired / Bluetooth)
- RFID Demo
- Channel setting
- Single search
- Multi search
- Wildcard search
- Data format setting
- Write test

Latest OS Version Required

Must use latest OS version for compatibility of features, especially when developing the write feature that specifies a tag to be written using SelMask.

Contact Point Mobile team to clarify the compatible OS version with your target features.
