

# CCKM Support in Point Mobile Android 11 Devices

CCKM (Cisco Centralized Key Management) is a form of Fast Roaming and a subset of the CCX (Cisco Compatible Extensions) specification. Find out whether Point Mobile devices with Android 11, especially PM67 and PM75 support CCKM.

Refer to [CISCO Support Page](#) to find more about CCKM fast roaming method.

---

## APPLIES TO

PM67, PM75

## CCKM Support

Point Mobile has launched the following models with Android 11.

- PM67
- PM75
- PM90
- PM451
- PM351 *(More may be released in the future)*

In contrast to other models supporting CCX at the first official OS version, PM67 and PM75 support the feature from the following versions.

- PM67: 67.02 (Mar 03 2022) and later
- PM75: 75.02 (Mar 22 2022) and later

If you cannot use fast roaming using CCKM in PM67 and PM75, update the device to the latest version and try again.
