Hide/Show Virtual Keyboard with Floating Button

Toggle the virtual keyboard (SIP) using the floating action button.

You can place the button anywhere you want, and simply tap it to show or hide the virtual keyboard.

APPLIES TO

Android	Model	Version
Android 7	PM550	55.15 (Aug 17 2022) and later
Android 9	PM451	41.09 (Mar 28 2023) and later
Android 11	PM67	67.04 (Nov 18 2022) and later
	PM451	41.52 (Nov 18 2022) and later
	PM351	35.02 (Mar 15 2023) and later

And the Point Mobile Android devices with Keypad (PM560, etc.)

Enable & Use Virtual Keyboard Floating Button

The virtual keyboard floating button is disabled by default. To use this button, enable it first.

1. Go to **Settings** > (System) > **Languages & input**.
2. Turn on **Enable virtual keyboard floating button**

> ⚠ **Also Turn On Built-in Keypad Mode**
>
> As the floating button is the easy-to-access toggle for **Show virtual keyboard** setting, you must either turn on the **Built-in Keypad Mode** to use the button.
>
> Refer to Hide or Toggle Virtual Keypad (SIP) to know why.

> ⓘ From Android 9 devices, you can turn on / off the **Enable virtual keyboard floating button** option in **EmSettings** as well.

Then, you can use the floating button for hiding/showing the virtual keyboard.

And you can move the floating button to where you want. While the button is moving, its outline changes to red.

When you tap the button, the virtual keyboard will be appeared or disappeared.
