

Turn on All Rotations using Scan2Set

APPLIES TO

Point Mobile Android devices

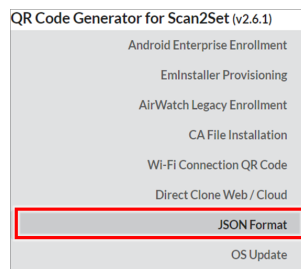

How to Turn on All Rotation setting using Scan2Set

1

Access QRCodeGenerator.

2

Select **JSON Format** among the side menu bar.

3

Enter the following code.

```
{
  "settings_provider": {
    "settings_value_list": [
      {
        "which": 2,
        "key": "all_rotations_enabled",
        "value": "1"
      }
    ]
  }
}
```

** Do not change "which" and "key" values.*

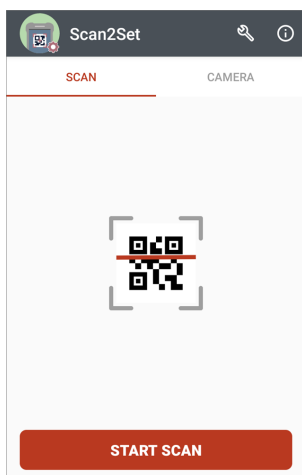

4

Click **Generate QRcode** on the bottom.

5

On device, launch Scan2Set from EmKit. And then, scan the QR code generated.
