

# Map Other Functions to the Navigation Bar Buttons

If you want to use the Home, Back, and Recent buttons as other functions, read this article.

You can map the specific keycode to the buttons using the Program Buttons.

## APPLIES TO

- **PM84:** 84.04 (Mar 15 2024) and later
- **PM86:** 86.02 (Mar 21 2024) and later

This feature will be applied to the models without the Home, Recent, Back buttons.

- PM451 / PM351 / PM75 / PM95, etc.

## How to map other functions

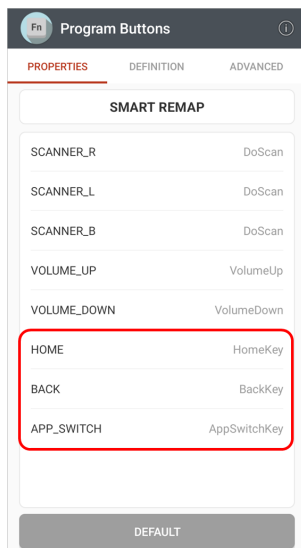

1

Launch **Program Buttons** from EmKit.

2

Select the button among the button list referring to the following key name.

- Home button → HOME
- Back button → BACK
- Recent button → APP\_SWITCH

3

Enter a keycode as you want to map.

Refer to the [Android Developer Site](#) (see **Constant Value** of each keycode).

A screenshot of a 'Direct input' dialog box. It has a title bar 'Direct input'. Below it is a label 'Keycode' followed by a text input field containing the number '3'. At the bottom are two buttons: 'CANCEL' (grey) and 'APPLY' (red).

Direct input

Keycode

3

CANCEL APPLY

4

Tap **APPLY** to save.
