PM3 ScanSetting via Demo Application

You can set up scan settings, for example, prefix & suffix, enable/disable symbologies to PM3.

Because PM3 has no keypad, detail scan setting can be set with PM demo application.

The demo application is available on Windows, android and even iOS. Therefore, you can use the app on your PC or mobile computer.

APPLIES TO

PM3

Connect device

- Windows Mobile 6.5

- Windows Phone 8.1

- Android 4.0.3 or above

- iOS 7.0.3 or above

- Support all version on PC

Connect PM3 to Your Device

First, install and execute Demo application on your device.

Then, on PM3, navigate to Menu > Pairing to ready to pair with your device.
