

Hide or Toggle Virtual Keypad (SIP)

If you don't want to use SIP (Soft Input Panel), or you use a hardware keyboard but want to use SIP as well sometimes for extended input characters, you can hide or set toggle the SIP.

APPLIES TO

- Android 7
 - PM550: All versions
- Android 8
 - PM45: 45.65 (Jun 24 2022) and later
 - PM85: 85.15 (Mar 06 2022) and later
- Android 9
 - PM45: 45.71 (Dec 04 2020) and later
 - PM85: 85.21 (Nov 18 2020) and later
 - PM90: 90.05 (Oct 30 2020) and later
 - PM451: All versions
- Android 11
 - All models

(For Android 6, see [Hide or Toggle Virtual Keypad \(SIP\) \(Android 6\)](#))

Before Start

To control the SIP, you must turn on the **Built-in Keypad Mode**.

Turn on the mode from:

- Settings  > System  > Language & input > Advanced > Built-in Keypad Mode
 - (Android 9 and above only) EmKit  > EmSettings  > Built-in Keypad Mode
-

Hide or Toggle Virtual Keypad

Error rendering macro 'excerpt-include'

User 'null' does not have permission to view the page.
