

How to run EmKitAgent in the background

Running EmKitAgent in the background is a newly added option from Scan2Stage v10.0.7.

If enable this option, you can prevent the EmKitAgent popup to the foreground while the users are working on the device.

APPLIES TO

Device - Point Mobile Devices running on Android 7 or above

Solution - Scan2Stage v10.0.7 or higher

How to set EmKitAgent to run in the background?

1. Go to profile creation screen on PMDM or Scan2Stage.
2. Select **Device**.
3. Select **Run on background** to run the EmKitAgent on the background.
