Extra Bundle

You should
insert
information
as yours.
Follow the
below format,
and change
the
information
marked in red
as yours.

"serverurl": "
Server URL",

"gid": "Grou
pID",

"un": "User
Name",

"pw": "Pass
word"

3. Generate QR Code

- Click **Generate QR Code** button

Generate QR Code

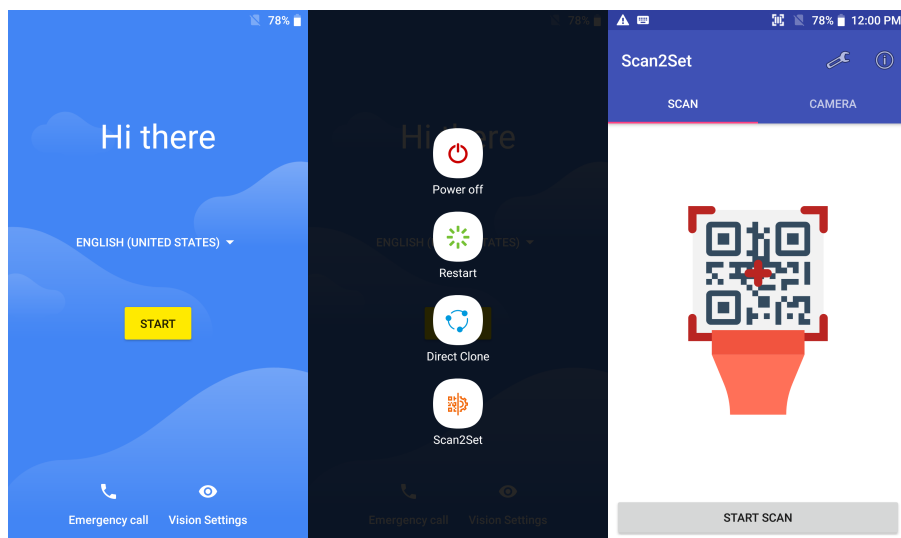

Clear

4. Scan the QR Code

- Make a factory reset and turn on your device
- Press and hold Power button until the power menu show up
- Select Scan2Set and Scan the QRcode

Scanner will be enabled automatically when you execute the Scan2Set

If you have a problem,

The QR code had security code so even you provide this QR code, we cannot analyze it. So if you cannot make enrollment, provide us below information. Then we will generate QR code and send it to you to help your testing.

- **Wifi Information**
- **Airwatch Info**
 - **Server URL**
 - **Group ID**
 - **User Name**
 - **Password**
