

# When Failed to Write NFC Tag

## ISSUE

Failed to write NFC tag

## APPLIES TO

All Point Mobile devices with NFC feature

## RESOLUTION

If you have a problem with writing the NFC tag, there may be two reasons.

1. **Tag protection**

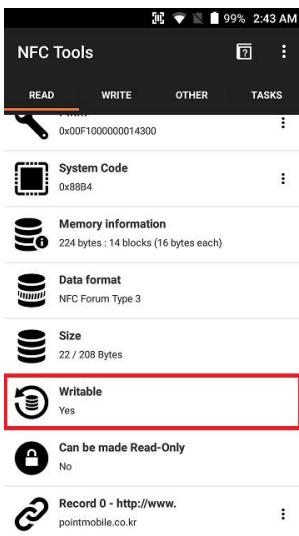

Due to security reasons, some NFC tags are protected from reading or writing

2. **Tag locking**

Some tags are locked and 'read-only'.

As the following figure, this information can be checked on the **READ** tab using **NFC tools**.

(NFC Tools can be downloaded from Google Play Store. Click below image to connect download page)
