

Cannot add app in EmKiosk with package name only

ISSUE

App does not be added in EmKiosk screen with package name only. Activity name should be inputted to add it.

RESOLUTION

Step1. Check Version

Adding an app to EmKiosk screen with package name only is supported from:

- Scan2Stage v10.0.13 and higher
- EmKiosk v1.0.13 and higher

Update the applications to the latest version and try again.

Step2. Check the app

Only the launcher app can be added without activity name. Make sure the app is set to show on the launcher.

If the app is not, you need to input the package name and activity name both.

EmKit Apps

The apps in EmKit folder are the examples. You need to input the package name and activity name both to add the apps into EmKiosk screen.
