

Set Notification for Scan Result

APPLIES TO

All Point Mobile Android devices with Scanner

How to Set Scanner Notification

You can adjust the scanner notification such as beep, vibrator, LED at one menu.

1. Go to Settings / EmKit > ScanSetting and Tap **Notification**.

Turn On Scanner

Scanner option menus(ex. notification, symbologies, etc.) are not displayed if the scanner is turned off.

Please turn on the scanner by tapping the Scanner On/Off switch.

2. Adjust scanner notification as below

Beep	Enable/Disable	Turn on / off the switch. (ON = Enable beep)
	Adjust sound volume	Scroll the level bar.
	Change beep sound when scanning is succeeded or failed	Tap Good read/Bad read and select sound file. For more detail, refer to <div>Change Scanner Beep Sound</div>
LED	Enable/Disable	Turn on / off the switch. (ON = Enable LED)
Vibrator	Enable/Disable	Turn on / off the switch. (ON = Enable Vibration)
	Change length of vibration (0~3seconds)	Tap Good read/Bad read and select the duration time of vibration.

If you want to know how to use other scanner settings, please refer to the following articles.
