

Hide or Toggle Virtual Keypad (SIP) (Android 6)

If you don't want to use SIP (Soft Input Panel), or you use a hardware keyboard but want to use SIP as well sometimes for extended input characters, you can hide or set toggle the SIP.

APPLIES TO

Point Mobile Android 6 devices (PM66, PM80)

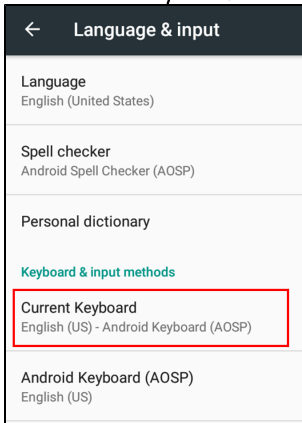

(If you are using Android 7 and above version, see [Hide or Toggle Virtual Keypad \(SIP\)](#).)

Hide or Toggle Virtual Keypad

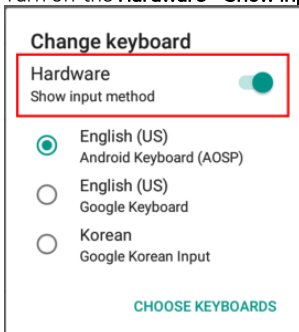

Hide Virtual Keypad as Default

When you hide the virtual keypad as default, the virtual keypad will not appear even if a textbox got focused.

1. Go to **Settings > Language & input**.
2. Select **Current Keyboard**.

3. Turn off the **Hardware - Show input method** switch.

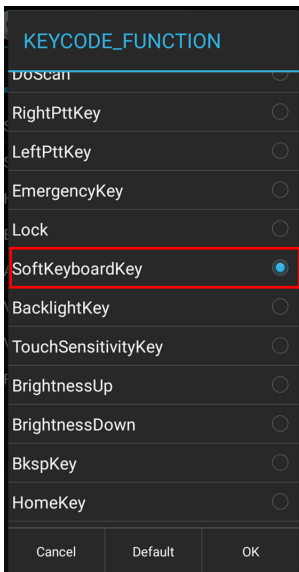

Set Toggle Virtual Keypad

You may want to use the virtual keypad sometimes even you hide the virtual keypad as default,

In this case, you can set the toggle button for the virtual keypad and use the button to show or hide the virtual keypad.

1. Go to **EmKit > Program Buttons**
2. Select a button you want to use for virtual keypad toggle.
3. Choose **SoftKeyboardKey** among the list.

If there is not **SoftKeyboardKey**, select **Direct Input** and enter **1008**.

4. Tap **OK** and tap **APPLY** to save the changes.
