What is Decode Mode?

Read the following descriptions if you are wondering what each option in Decode Mode means.

Decode Mode options is in ScanSettings > Option.

APPLIES TO

Point Mobile Android devices with the following scanner

- N6603: PM66, PM70, PM80, PM550, PM85, PM67, PM75
- N360X: PM85, PM500, PM67, PM75
- N2601: PM30
- N6703: PM550, PM90, PM451
- EX30 (Long-range): PM451

Decode Mode

Set appropriate decode mode with your scanning job. Go to **ScanSettings** > **Option**.

Standard (*Default)	Default decode mode.
Priority to 2D Barcode	Focused on 2D barcode. (Read 2D barcode first rather than 1D barcode when 1D and 2D barcodes are together.)
Fixed Focus	Change scanner focus from auto to fixed.
